

How to Use the Login Redirect Feature Update - Version 8.1.3

- 1 To allow Users to bypass their Homepage Dashboard, and be directed to their 'My Courses' landing page, navigate to Admin > User Management > User Roles > Edit.

Scroll down to the Login Redirect dropdown and select the new option of MY COURSES then Save.

- 2 Once the new setting has been saved, all users upon Login will automatically be directed to the My Courses Landing page.

Note: For those Version 8 clients currently utilizing the "Relational Dashboard" for their users, the Login Redirect would be overridden. The Relational Dashboard would need to be *disabled* in order for the new **Login Redirect** URL to take effect.

(For a step-by-step process on how to disable the Relational Dashboard, see page 2.)

How to Disable Relational Dashboard

- 3 To disable the “Relational Dashboard” navigate to Admin > Config & Settings > General Settings > Relational Dashboard
